

**Direct anthropogenic drivers** are human decisions and actions that immediately affect biodiversity (IPBES Conceptual Framework).

**Biodiversity** means the variability among living organisms from all sources ... this includes diversity within species, between species and of ecosystems. (*Convention on Biological Diversity, 1992*)

**Systematic Map:** Corpus of literature retrieved using the pre-defined search query

**Evidence** includes records where a biodiversity change (*Outcome*) is reported as linked to one or more anthropogenic drivers (*Exposure*) for biodiversity as a whole (*Population*)

**Coded across six dimensions** using pre-defined classification schemes, where possible
